

Enrie John Edem

Infrastructure & Systems Engineer · Linux · Proxmox VE · Automation

Parañaque City, Metro Manila, Philippines | +63 950 465 6709 | enriejohnedem@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Infrastructure engineer administering a 7-host, bare-metal Proxmox VE environment supporting ~700 users — 24 production LXC containers and 12 VMs — since 2022. Cut provisioning time ~93% by building reusable Ansible and Terraform automation, and stood up self-hosted CI/CD plus encrypted, restore-tested MySQL backup workflows from scratch. Comfortable end-to-end, from bare-metal virtualization up through the Laravel/Vue applications running on top of it.

TECHNICAL SKILLS

Infrastructure: Proxmox VE, LXC, KVM, Linux Administration, Windows Server, VMware, Backup & Recovery

Automation & IaC: Ansible, Terraform (bpg/proxmox), Bash, Python, PowerShell, Infrastructure as Code

CI/CD & Services: Git, Gitea, Gitea Actions, MySQL/MariaDB, MSSQL, Nginx, Apache, SSH

App Development: PHP/Laravel, Vue 3, Inertia.js, React, TypeScript, Java/Spring Boot, JavaScript, SQL, REST APIs

Practices: RBAC, Incident Troubleshooting, Root Cause Analysis, UAT, Technical Documentation

PROFESSIONAL EXPERIENCE

Philippine EDS Techno-Service Inc. — Yazaki Japan Affiliate

Parañaque City, Philippines

Promoted twice since joining in August 2022

Senior Technical Support Analyst — Infrastructure & Systems Engineering

Oct 2025 – Present

- Administer a **7-host** bare-metal Proxmox VE environment — 24 LXC containers and 12 Linux/Windows VMs — supporting **~700 staff**, and provide senior escalation for server and application incidents.
- Introduced Git version control company-wide via a self-hosted Gitea platform on AlmaLinux, now standard for source control and Gitea Actions CI/CD (Laravel/Vue build/test/deploy); documented in an onboarding runbook.
- Cut VM/LXC provisioning time by **~93%** via a Gitea Actions CI/CD pipeline that runs Ansible playbooks and Terraform modules (bpg/proxmox), eliminating configuration drift.
- Automated encrypted MySQL backups with verified, restore-tested recovery procedures for production databases.
- Designed a Linux-first Proxmox workload strategy projected to avoid over **₱8M** in commercial virtualization licensing, while retaining VMs for platform-dependent workloads.

Junior Technical Support Analyst

Aug 2023 – Oct 2025

- Provisioned and secured Linux VMs and unprivileged LXC containers for internal hosting, and automated recurring deployment/maintenance tasks in Bash and Python, including UAT coordination and documentation.
- Built Laravel, Vue 3/Inertia.js, and Spring Boot applications, including a purchasing management system with role-based access control (RBAC) and multi-level departmental approval workflows.

Associate Technical Support Analyst

Aug 2022 – Aug 2023

- Developed and maintained internal Java and PHP applications supporting affiliate business operations, resolving system requests, defects, and day-to-day IT operational incidents for regional affiliates.

SELECTED PROJECTS

- GIS Asset Management** (Laravel, Inertia, React, TypeScript) — company-wide asset-tracking and audit platform with LDAP/AD auth and tiered RBAC; resolved a shared PHP-FPM bottleneck by measuring traffic (**~23:1**) and re-provisioning dedicated pools.
- Infra Control Plane** (Laravel, Vue, Inertia) — internal Proxmox tool with an agentic copilot layer (“LLM proposes, deterministic code validates and executes”) and a Prometheus/Redmine ops-dashboard prototype.

EDUCATION

Bachelor of Science in Information Technology — Bohol Island State University

2018 – 2022

Balilihan Campus, Bohol, Philippines · Official campus website programmer & designer · Proficient Student Award, 2022

CERTIFICATIONS & TRAINING

- AWS Certified Cloud Practitioner (CLF-C02)** — exam preparation in progress, 2026
- VMware Horizon 8: Deploy and Manage — 40 hours, Jun 2023
- Mastering Linux and Laravel 10 — Udemy, Dec 2023
