PROFESSIONAL SUMMARY

Infrastructure and systems engineer with experience since 2022 administering Linux and Windows workloads, Proxmox VE virtualization, infrastructure automation, CI/CD, and internal applications. Administers a 7-host environment supporting systems used by approximately 700 staff, including 24 production LXC containers and 12 production VMs. Reduced provisioning time by approximately 93% with Ansible and Terraform and implemented self-hosted CI/CD plus automated MySQL backup and restore workflows.

TECHNICAL SKILLS

Infrastructure: Proxmox VE, LXC, KVM, Linux administration, Windows Server, VMware, backup and recovery

Automation and IaC: Ansible, Terraform (bpg/proxmox), Bash, Python, Infrastructure as Code (IaC)

CI/CD and services: Git, Gitea, Gitea Actions, MySQL/MariaDB, Nginx, Apache, SSH

Application development: PHP/Laravel, Vue 3, Inertia.js, Java/Spring Boot, JavaScript, SQL, REST APIs

Practices: role-based access control (RBAC), incident troubleshooting, root cause analysis, UAT, technical documentation

PROFESSIONAL EXPERIENCE

Philippine EDS Techno-Service Inc. - Yazaki Japan Affiliate | Parañaque City, Philippines

Promoted twice since joining in August 2022

Senior Technical Support Analyst | Infrastructure & Systems Engineering | Oct 2025 - Present

- Administer a 7-host bare-metal Proxmox VE environment with 24 production LXC containers and 12 production Linux/Windows VMs supporting systems used by approximately 700 staff; provide senior escalation for server and application incidents.
- Reduced VM and LXC build-to-ready provisioning time by approximately 93% using reusable Ansible playbooks and Terraform modules with the bpg/proxmox provider, standardizing deployments and reducing configuration drift.
- Built a self-hosted Gitea and Gitea Actions platform on AlmaLinux to automate build, test, and deployment workflows for Laravel/Vue applications; documented system onboarding in an internal runbook.
- Automated encrypted MySQL backups and established verified restore procedures for production databases, replacing a manual and unaudited process.
- Designed a Linux-first Proxmox workload strategy projected to avoid more than PHP 8 million in commercial virtualization licensing costs while retaining VMs for platform-dependent workloads.

Junior Technical Support Analyst | Aug 2023 - Oct 2025

- Provisioned, secured, and operated Linux VMs and unprivileged LXC containers for internal application hosting, establishing repeatable container conventions.
- Developed Laravel, Vue 3/Inertia.js, and Spring Boot applications, including a purchasing management system with role-based access control (RBAC) and multi-level approval workflows across departments.
- Automated recurring deployment and maintenance tasks with Bash and Python; coordinated user acceptance testing (UAT) and authored deployment, configuration, and application documentation.

Associate Technical Support Analyst | Aug 2022 - Aug 2023

- Developed and maintained internal Java and PHP applications supporting affiliate business operations.
- Resolved system requests, defects, feature enhancements, application-support incidents, and daily IT operational issues for regional affiliates.

EDUCATION

Bachelor of Science in Information Technology | Bohol Island State University | 2018 - 2022

Balilihan Campus, Bohol, Philippines | Official campus website programmer and designer | Proficient Student Award, 2022

PROFESSIONAL DEVELOPMENT

AWS Certified Cloud Practitioner (CLF-C02) exam preparation - in progress, 2026

Training: VMware Horizon 8: Deploy and Manage (40 hours, Jun 2023); Mastering Linux (Udemy, Dec 2023); Laravel 10 (Udemy, Dec 2023)
