## PROFESSIONAL SUMMARY

---

Results-driven Software Developer and Linux System Administrator with 3+ years of experience designing, developing, and maintaining in-house applications and production server infrastructure for a multinational manufacturing affiliate. Proven track record in automation engineering—building Ansible playbooks, deployment scripts, and custom web tools that streamline server provisioning and internal operations. Skilled in managing Proxmox virtualization environments, LXC containers, Docker workloads, and full software lifecycle delivery using Java, PHP/Laravel, and Python. Adept at bridging development and operations to deliver reliable, scalable, and secure systems.

## CORE COMPETENCIES

---

- **Software Development & Automation:** Full-stack web development, scripting, internal tool creation, Ansible automation, CI-style deployment workflows
- **System Administration:** Proxmox VE, LXC container orchestration, Docker, KVM, VMware, Linux server hardening, backup & recovery
- **Programming Languages:** Java, JavaScript, PHP, Python, SQL, Bash
- **Frameworks & Libraries:** Laravel, Spring Boot, Java Swing
- **Operating Systems:** Ubuntu Server, Alma Linux, Debian, Windows Server 2012/2016/2025
- **Databases & Tools:** MySQL/MariaDB, Git, Apache, Nginx, SSH
- **Soft Skills:** Technical documentation, end-user coordination, root-cause analysis, escalation handling, mentoring

## PROFESSIONAL EXPERIENCE

---

### Senior Technical Support Analyst

Oct 2025 – Present

*Philippine EDS Techno-Service Inc. (Yazaki Japan Affiliate)*

- Lead administration and maintenance of company servers, ensuring high availability of production systems supporting daily affiliate operations.
- Design, provision, optimize, and secure Linux-based virtual machines and LXC containers within a Proxmox VE hypervisor environment.
- Authored Ansible playbooks for automated Proxmox VM/LXC provisioning, reducing deployment time and eliminating manual configuration errors.
- Manage Docker workloads for containerized in-house applications, including image builds, networking, and persistent storage.
- Serve as senior escalation point for system, server, and application-level incidents across multiple affiliates.
- Drive automation and optimization of internal workflows through custom-built web tools and Bash/Python scripts.
- Oversee the full software lifecycle: requirements gathering, design, development, deployment, documentation, and maintenance.
- Ensure stability and continuity of legacy Windows Server applications while planning phased improvements and Linux migrations.

### Junior Technical Support Analyst

Aug 2023 – Oct 2025

*Philippine EDS Techno-Service Inc. (Yazaki Japan Affiliate)*

- Configured and deployed Linux-based virtual machines and LXC containers on Proxmox for in-house application hosting.

- Developed internal web applications using Laravel (PHP) and Spring Boot (Java) to support affiliate business processes.
- Built deployment and maintenance scripts in Bash and Python to automate routine server tasks and reduce manual workload.
- Coordinated with end users for User Acceptance Testing (UAT), validation, and feedback incorporation.
- Created technical documentation covering software features, deployment procedures, and system configurations.
- Maintained and enhanced existing applications to ensure optimal performance, security, and uptime.
- Supported server operations and assisted in troubleshooting OS-, network-, and application-level issues.

### **Associate Technical Support Analyst**

Aug 2022 – Aug 2023

*Philippine EDS Techno-Service Inc. (Yazaki Japan Affiliate)*

- Developed and maintained in-house software applications using Java and PHP to support affiliate business operations.
- Handled system requests, bug fixes, and feature enhancements raised by Yazaki affiliates across the region.
- Designed, modified, debugged, and maintained software solutions aligned with technical and business requirements.
- Assisted in day-to-day IT operations, application support, and incident resolution.

### **KEY PROJECTS & ACHIEVEMENTS**

---

- Ansible-based Proxmox Deployment Automation – Designed and implemented Ansible playbooks that automate VM and LXC container provisioning on Proxmox, standardizing builds and significantly reducing deployment time.
- Server Infrastructure Buildout – Established company server infrastructure on a Linux stack (Proxmox, Ubuntu Server, Alma Linux, Debian) supporting in-house applications and production workloads.
- Internal Web Tools – Created custom Laravel and Spring Boot web applications and utility scripts that streamline deployment, monitoring, and routine administrative tasks.
- University Website (Bohol Island State University) – Served as programmer and designer for the official campus website during undergraduate studies.
- Awarded Outstanding Contribution to ICT Services Unit and Proficient Student Award (2022).

### **EDUCATION**

---

Bachelor of Science in Information Technology

June 2018 – July 2022

*Bohol Island State University – Balilihan Campus, Bohol, Philippines*

### **CERTIFICATIONS & TRAINING**

---

- Linux Training Completion – Dec 4, 2023
- Laravel Training Completion – Dec 1, 2023
- VMware Training Completion – Jun 29, 2023
- Proficient Student Award – Jul 12, 2022
- Outstanding Contribution to ICT Services Unit – Jul 12, 2022
- Campus Publication Layout Artist Recognition – Jul 12, 2022
